## Colour and Compounding

Our L.V. Lomas technical sales team has both the experience and industry knowledge to help you successfully meet any formulation challenge. Our comprehensive product range covers an extensive array of products from flame retardants, antiblock additives, functional extenders, organic pigments for plastics and the top lines of metallic and effect pigments available to the Canadian market, with which you can achieve the softest satin effects to the most brilliant sparkles. We're also ready with innovative design solutions to help with custom colour as well as security requirements for plastic masterbatch and compounding.

Below are a list of solutions that L.V. Lomas supplies the colour and compounding industry. Our products are all sourced from the world's leading manufacturers.

Requirement	Solutions
Flame Retardants, Smoke Suppressants	Alumina Trihydrate, Magnesium Hydroxide, Antimony Replacements, Zinc Borates, Molybdate Complexes
U.V. Stabilization	HALS, U.V. Absorbers
Antioxidants	Blends, Hindered Phenols, Phosphites
Anti-stats	Quaternary Ammonium Compounds
Antiblock Additives	Diatomaceous Earth, Nepheline Syenite, Precipitated Silica, Talc, Calcium Carbonate
Functional Extenders	Barium Sulfate, Calcined Clay, Calcium Carbonate, Nepheline Syenite, Talc, Zinc Oxide
Lightweight Fillers	Ceramic Microspheres, Glass Bubbles
Colour Pigments	Anatase Titanium Dioxide, Blanc Fixe, Carbon Black, Chrome Green Oxide, Mixed Metal Oxides, Organic Pigments, Rutile Titanium Dioxide, Synthetic Iron Oxide, Zinc Ferrite
Effect Pigments	Fluorescent Pigments, Metallics (Aluminium & Bronze), Pearlescents, Laser Marking, Optical Brighteners
Lubricants	N N' Ethylene Bis 12-Hydroxystearamide, Metal Stearates, Stearic Acid, White Oil

These are just some of the hundreds of solutions we can bring to your enterprise. Call your L.V. Lomas representative today and start converting your colour & compounding challenges into flawless products.

Proudly representing our Principal Partners in the plastics industry
